

Hemiptera of Iraq. III. Heteroptera, Miridae (Phylinae)

Rauno E. Linnauvori

Linnauvori, R. E. 1993: Hemiptera of Iraq. III. Heteroptera, Miridae (Phylinae). — Entomol. Fennica 4:253–271.

An annotated list of the 76 species of the Miridae subfamily Phylinae known to occur in Iraq is presented. New synonymies: *Chamaepsallus* Wagner 1965 = *Badezorus* Distant 1910, *Badezorus tyrianus* Distant 1910 = *Atomoscelis signaticornis* Reuter 1904, *Maurodactylus pictus* Wagner 1975 = *Psallus deserticola* Wagner 1951, *Campyloamma minima* Wagner 1960 and *C. verticata* Wagner 1961 = *C. incerta* Villiers 1956. New combinations: *Chamaepsallus signaticornis* (Reuter 1904) = *Badezorus signaticornis* (Reuter 1904), *Chamaepsallus tomentosus* (Reuter 1904) = *Badezorus tomentosus* (Reuter 1904).

Rauno E. Linnauvori, Somersoja, FIN-21220 Raisio 22, Finland

As pointed out in the preface to Part I of the Hemiptera of Iraq (Linnauvori 1992), only very few records (Hoberlandt 1949 and 1953) of the Miridae fauna of Iraq have been published. Numerous new species were described in Linnauvori 1984. A list containing 76 species of the subfamily Phylinae is published below. Since 98 species were listed in the previous part, the total number of the known Miridae species from Iraq is 174. From the zoogeographical point of view a strong penetration of the Mediterranean element into the steppe and mountain regions of northern Iraq is noticeable. The fauna of the semidesert and desert zone resembles that of the adjacent parts of Saudi Arabia, although several species typical to the main parts of the Arabian deserts seem to be absent, undoubtedly owing to differences in the climatic and edaphic factors.

The collected material is the property of the American Museum of Natural History, but at present kept in the author's collection.

Subfamily Phylinae

Tribe Hallodapini

Acorrhiniun conspersus Noualhier, 1895

Material: Several exx from Dukan, 12.VI.1980; Salahu-din, 12.VI.1980; Sarsang, 26–28.VIII.1980, Linnauvori; Shaqlawa, 1 ex, Kalalova.

Biology: On bark of trunks and branches of large oaks. No connection with ants was observed.

Distribution: Syrio-Anatolian, recorded from Syria, Turkey, Bulgaria, and Iraq (Hoberlandt 1953:378).

Trichophorella splendida Linnauvori, 1984

Material: Baghdad, ♂ holotype, many paratypes, IV–VIII.1980; Ana, 1 paratype, 8.X.1979; Ain Al Tamar, 1 paratype, 17.VII.1980, Linnauvori, in coll. Linnauvori (AMNH).

Biology: At lamps.

Distribution: Eremian, with Arabian distribution. Also known from Saudi Arabia.

Hallobanus pseudoconcolor (Linnavuori, 1984), comb. n.

Plagiorrhamma pseudoconcolor Linnavuori 1984:40.

Material: Sarsang, ♂ holotype, several paratypes, 26–28.VIII.1980; several paratypes also from Baghdad, IV–VI.1980 and Al Qosh, 25.VIII.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: At lamps.

Distribution: Endemic.

Hallobanus costai (Reuter, 1890)

Material: Several exx from Ain Al Tamar, 17.VIII.1980; Ain Al Tamar-Karbalah, 20.X.1979; Baghdad, IV–VII.1980; Dawra, 15.IX.1979, Linnavuori.

Biology: Under plants in fields and saline and sandy habitats. At lamps.

Distribution: Eremian, extending from the Cape Verde Islands to the Arabian Peninsula, Israel and Iraq.

Hallobanus pilosus (Reuter, 1882)

Material: Baghdad, 5 exx, IV–VIII.1980, Linnavuori.

Biology: At lamps.

Distribution: Holosudanese. Also known from Saudi Arabia.

Laemocoris orpharus Linnavuori, 1964

Material: Ain Al Tamar, 5 exx, 17.VII.1980, Linnavuori.

Redescription in Linnavuori 1984:39–40.

Biology: Under halophytic shrubs (*Zygophyllum*, *Anabasis articulata*) in a salt marsh. Living in colonies of a small red ant species, which in its body form and movements is misleadingly similar to females of *L. orpharus*.

Distribution: Eremian, with Arabian distribution. Also known from Saudi Arabia.

Systellonotus thymi Signoret, 1859

Material: Several exx from As Salman, 3.IV.1981; As Salman-Takhadid, 17.IV.1980, Linnavuori.

Biology: Together with ants under plants in sandy and gravelly habitats.

Distribution: Holomediterranean.

Alloeomimus kurdus Hoberlandt, 1953

Figs. 1a–h, 7a

Material: Aqra, 2 exx, 29.VIII.1980; Baghdad, 2 exx, IV–VI.1980; Baghdadi, 2 exx, 8.X.1979; Darbandikhan, 1 ex, 13.V.1980; Penjwin, 1 ex, 11.VI.1980; Qora, 1 ex, 13.VI.1980, Linnavuori.

Length 3.6–4.5 mm. Very similar to *A. unifasciatus* (Reuter, 1879). Colour black (pale general colouring mentioned in the original description is apparently caused by immaturity; at least an immature specimen from Baghdadi is reddish brown). Head, pronotum, scutellum, apex of corium, and cuneus shinier than in *A. unifasciatus*. Basal part of pronotum more convex. Antennae more gracile, proportions between segments 10:29:26:18 (♂), 10:30:26:21 (♀), 2nd joint 1.3 (♂), 1.25 (♀) × as long as basal width of pronotum. Ocular index about 1.71 (♂) or 1.82 (♀) (in *unifasciatus* about 2.0 (♂), 2.53 (♀)). Elytra in females about as long as abdomen, with distinct membrane (females of *unifasciatus* cryptobrachypterous with elytra much shorter than abdomen, membrane reduced).

Male genitalia in Fig. 1b–h, those of *A. unifasciatus* in Fig. 1i–k.

Biology: Among plants in hilly steppes. At lamps.

Distribution: Endemic (type locality: Shaqlawa).

Alloeomimus pilosus Linnavuori, 1984

Material: Penjwin, ♀ holotype, ♂ paratype, 11.VI.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: Among plants on dry precipice of a calcareous hill.

Distribution: Endemic.

Glaphyrocoris ebikh Linnavuori, 1984

Material: Sarsang, ♂ holotype, 26–28.VIII.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: At lamp in a deciduous mountain forest.

Distribution: Endemic.

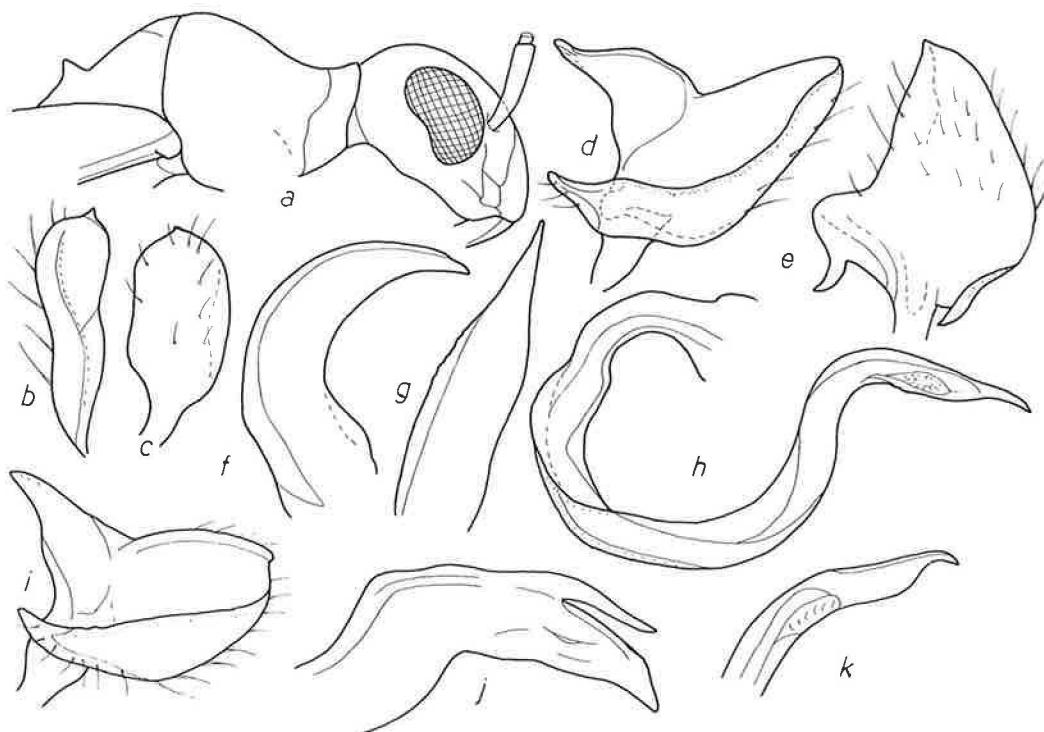

Fig. 1. *Alloeomimus kurdus* Hoberlandt. a: female head and thorax in lateral view; b–c: right style; d–e: left style; f–g: theca in lateral and in dorsal view; h: vesica. — *A. unifasciatus* (Reuter) (ex from Tunisia, Oued Zeroud). i: left style; j: theca in lateral view; k: apex of vesica.

Tribe Phylini

Nasocoris albipennis Lindberg, 1939
Fig. 2a–d

Material: Many exx from Abu Ghair, 15–16.IV.1980; Tharhar lake, 23.VIII.1979; Waqisah, 1.V.1980, Linnavuori.

Biology: On *Ephedra alata* in semideserts.
Distribution: Eremian, known from Egypt, Saudi Arabia and Israel.

Nasocoris serratus Linnavuori, 1984

Material: As Salman-Takhadid, ♂ holotype, several paratypes, 17–18.IV.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Ephedra foliata* in a little gravelly wadi.

Distribution: Endemic.

Macrotylus (Macrotylus) perdictus Kiritshenko, 1938

Material: Aqra, 8 exx, 12.V.1981; Kalak, 1 ex, 13.V.1981, Linnavuori.

Biology: On *Echinops* in hilly steppes of northern Iraq.

Distribution: Syrio-Anatolian, recorded from Cyprus, Israel, Syria, Turkey, Iran, and southern Russia.

Macrotylus (Alloeonycha) ancyranus
Seidenstücker, 1969

Material: Gully Ali Beg, 2 exx, 13.VI.1980, Linnavuori.

Biology: In a hilly habitat. In Turkey found on *Salvia*.

Distribution: Anatolian, previously known from Turkey.

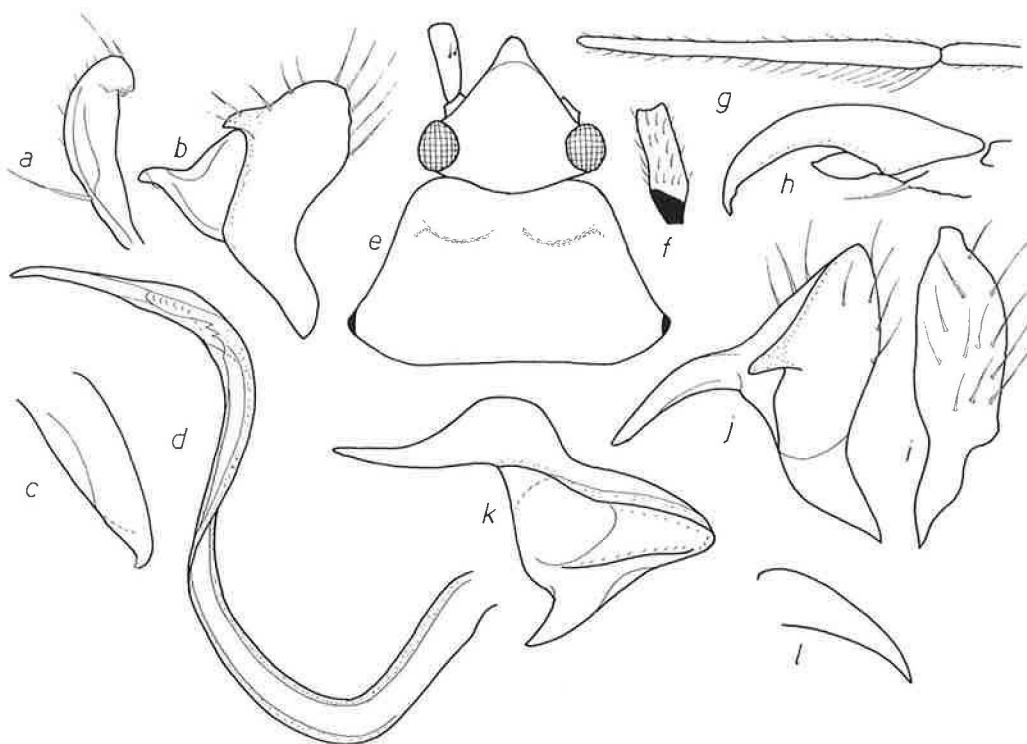

Fig. 2. *Nasocoris albipennis* Lindberg. a: right style; b: left style; c: theca; d: vesica. — *Oncotylus basicornis* Horvath. e: female head and pronotum; f: 1st antennal joint; g: male 3rd antennal joint; h: claw; i: right style; j–k: left style from side and from above; l: theca.

Macrotylus (Alloeonycha) dahukanus
Linnavuori, 1988

Material: Brozah, holotype male, a female paratype, 13.V.1981; Darbandikhan, 1 paratype, 13.V.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: In mountain meadows.

Distribution: Endemic.

Oncotylus (Cylindromelus) setulosus
(Herrick-Schäffer, 1837)

Material: Qora, 9 exx, 13.VI.1980, Linnavuori.

Biology: In a mountain meadow. On *Centaurea* (Wagner 1975a:249).

Distribution: Holomediterranean.

Oncotylus (Oncotylus) basicornis Horvath, 1901
Figs. 2e–l, 3a

Material: Shaykh Addy, 5 exx, 11.V.1981, Linnavuori.

Description in Wagner 1975a:253–254 is completed with the following data: Body 4.0 (σ) or 3.2 (φ) \times as long as basal width of pronotum. Ocular index 2.1 (σ), 2.16–2.36 (φ). Proportions between antennal segments 11:47:33:17 (σ), 12:43:28:17 (φ), 2nd joint 2.1 (σ) or 1.72–1.83 (φ) \times as long as diatome, 1.31 (σ) or 1.02–1.16 (φ) \times as long as basal width of pronotum; under surface of 3rd antennal segment in σ with long hairs. Hind tibia about 2.45 (σ) or 1.8–2.2 (φ) \times as long as basal width of pronotum.

Male genitalia in Figs. 2i–l, 3a.

Biology: In mountain meadows.

Distribution: Syrio-Anatolian; recorded from Syria (Akbes) and Turkey (Gaziantep).

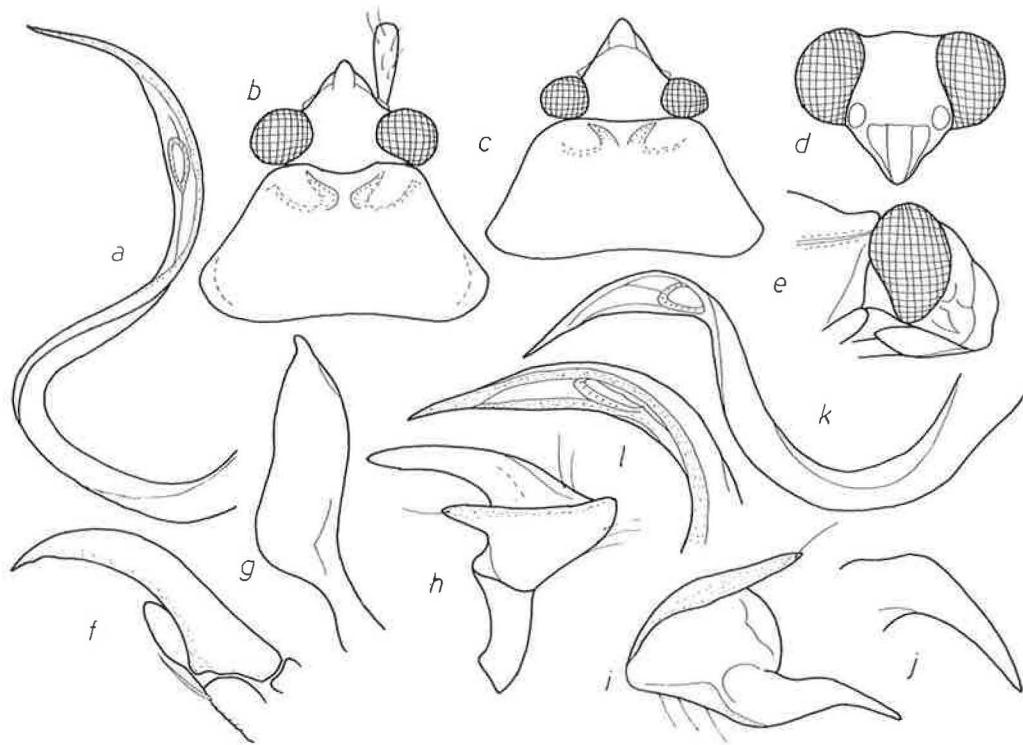

Fig. 3. *Oncotylus basicornis* Horvath. a: vesica. — *Stenoparia putoni* Fieber. b–c: male and female head and pronotum; d–e: male head in apical and in lateral view; f: claw; g: right style; h–i: left style from side and from above; j: theca; k: vesica; l: apex of vesica.

Oncotylus (Oncotylus) innotatus Wagner, 1970

Material: Many exx from Khorsabad, 11.V.1981 and Sinjar, 7.V.1981, Linnavuori.

Biology: In hilly steppes of northern Iraq. Swept from luxuriant vegetation consisting of grasses, Papilionaceae, Labiate, and Compositae.

Distribution: Syrio-Anatolian, recorded from Syria, Israel and Turkey.

Stenoparia putoni Fieber, 1870

Fig. 3b–l

Material: Many exx from Al Hadr, 6–7.V.1981; Al Qosh, 10.V.1981; Rutba-Al Qaim, 4.V.1981; Sinoni, 8–9.V.1981; Safwan, 1 ex, 30.III.1981, Linnavuori. All specimens are dark-spotted (f. *punctata* Reuter, 1879).

Biology: In steppes. Recorded from *Artemisia* (Wagner 1975a:381).

Distribution: Holomediterranean.

Psallopsis basalis Reuter, 1904

Fig. 4a–e

Material: Iraq: Nasiriya-Abu Ghar, many exx, 15.IV. 1980, Linnavuori. Iran: Sisten, Shahr-i-Sokulta, 2 exx, 24.IX.1977, A. Vigna. Israel: Neot Hakikkar, many exx, 16–20.VII.1986, Linnavuori. Jordan: Suweima, numerous exx, 22.VII.1981, Linnavuori. Saudi Arabia (localities listed in Linnavuori 1986:177).

Biology: In salt marshes on halophytes such as *Zygophyllum*.

Distribution: Eremian, extending from Palestine to Iran.

Psallopsis bisulcis Linnavuori, 1961

Figs. 4f–i, 5a–d

Types: Palestine, ♂ holotype in coll. Linnavuori (AMNH), ♂ paratype in Mus. Helsinki, Bodenheimer.

Material: Iraq: Ana, 2 exx, 8.X.1979; Basra, 1 ex, 12.IV.1980; 50 km SE Nasiriya, 1 ex, 14.IV.1980; Nasiriya-

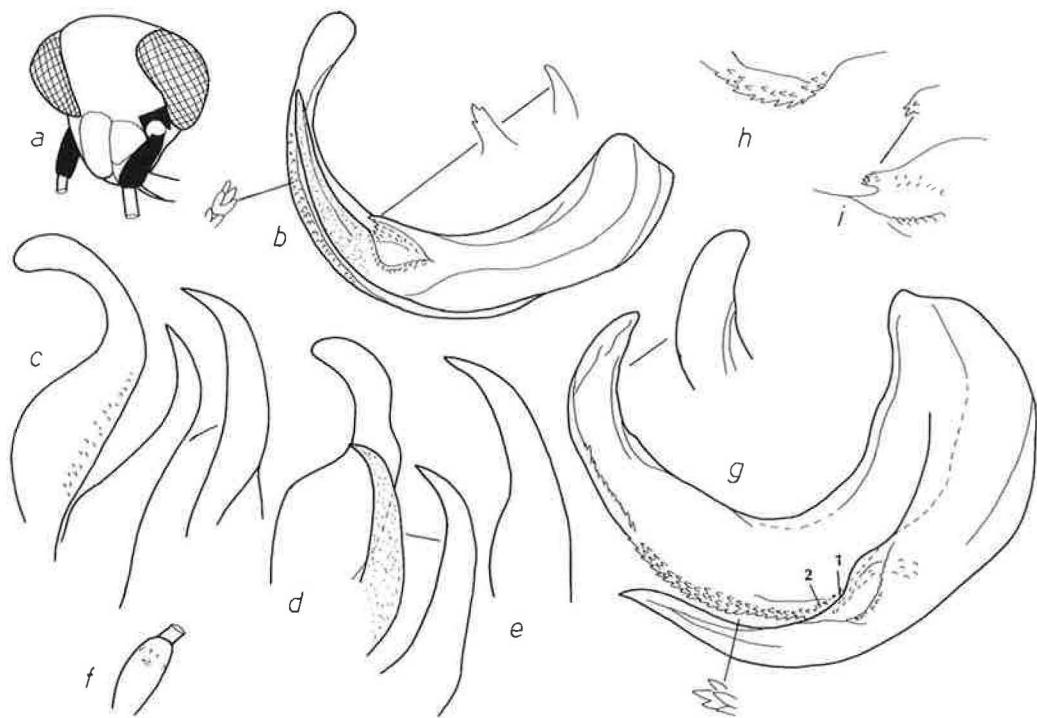

Fig. 4. *Psallopsis basalis* Reuter. a: head in anterolateral view; b: vesica (ex from Abu Ghar), lateral view; c-d: apex of vesica (exx from Abu Ghar and Al Hasa) in ventral view; e: lower sclerotized process of vesica (ex from Suweima). — *P. bisulcis* Linnavuori. f: 1st antennal joint; g: vesica (ex from Tharthar lake) in lateral view; h-i: processes marked with 1 and 2 in fig. g.

Abu Ghar, 1 ex, 31.III.1981; Rutba-Al Qaim, 2 exx, 4.V.1980; Tharthar lake, 7 exx, 13.IX.1979, Linnavuori. Israel: many exx from Nahal Arugot, 22.VII.1986; Neot Hakikkar, 16–20.VII.1986, Linnavuori. Turkestan: Turkmeneskaya SSR, Zahmjat, 3 exx, 24.IX.1975, Puchkov.

Wagner (1975a:388) regarded *P. bisulcis* as a pale form of *P. basalis*. Both taxa are, in fact, closely related, but nevertheless separate sister species. The main differences are:

- 1) *P. bisulcis*: Head and 1st antennal segment uniformly pale, the latter at most with a few indistinct brownish spots. — *P. basalis*: 1st antennal segment and a spot above antennal pits extending from base of clypeus to inner margin of eye blackish brown.
- 2) *P. bisulcis*: Lower sclerotized process of vesica longer, straight, sharply needle-like. — *P. basalis*: Lower sclerotized process of vesica shorter and thicker, apically curved. The up-

per, weakly sclerotized process of vesica is variable in shape, although it is often broader in *P. basalis*.

Both taxa are sympatric and occur even in same localities (Neot Hakikkar, Nasiriya-Abu Ghar). Since no intermediates are known, crossbreeding between them apparently does not occur.

Biology: In salt marshes on halophytes. At Tharthar lake found on *Aellenia subaphylla*.

Distribution: Eremian, extending from Palestine to Turkestan.

Psallopsis rufifemur Wagner, 1958

Material: Many exx from Ain Al Tamar-Ramadi, 20.IV.1980; Basra, 12.IV.1980; Nasiriya-Abu Ghar, 15.IV and 29.VI.1980; Safwan, 30.III.1980; Sawa lake, 30.III. 1981, Linnavuori.

Biology: In salt marshes on halophytes such as *Arthocnemum glaucum*, *Salicornia herbacea* and *Seidlitzia rosmarina*.

Distribution: Iranian, extending from Iraq and the adjacent parts of Saudi Arabia to Iran.

Psallopsis similis Wagner, 1958

Material: Iraq: Ana-Al Qaim, 1 ex, 5.V.1980; Baghdad, 1 ex, V–VI.1980; Al Hadr, 3 exx, 6–7.V.1981; Rawah-Al Hadr, 1 ex, 6.V.1981; Safwan, 6 exx, 30.III.1981; Sawa lake, 3 exx, 21.X.1979; Tharthar lake, 2 exx, 31.X.1979, Linnavuori. Syria: Deir es Zor, 1 ex, 11.VIII.1979, Linnavuori. Israel: 'Ein Avdat, 2 exx, 10.VIII.1986, Linnavuori.

Biology: In semideserts. At Tharthar lake found on *Calligonum comosum*.

Distribution: Eremian, extending from Palestine to Iran.

Glaucopterum lycii Puchkov, 1975

Claucopterum lycii Puchkov 1975:1040–1041.

Claucopterum lycii Linnavuori 1984: 43 (Kerzhner 1984: 46–47).

Types: Abu Ghar-Busaya, ♀ holotype and 2 ♀ paratypes of *G. lycii* Linnavuori, 1.IV.1981, Linnavuori, in coll. Linnavuori (AMNH).

Material: Turkestan: Turkmenskaya SSR, Kazandžikskii r.pos, Ahča-Kuima, 1 ♂ and 2 ♀♀ of *G. lycii* Puchkov, 7.V.1974, Puchkov, in coll. Linnavuori (AMNH).

G. lycii Linnavuori, a homonym of *G. lycii* Puchkov, was synonymized with the latter species by Kerzhner (1984:46–47). The examined females of *G. lycii* Puchkov differs from Iraqi specimens in larger eyes, ocular index 2.23–2.38 (in Iraqi specimens 2.50–2.53). Moreover, the 2nd antennal segment is somewhat shorter, 1.25–1.40 × as long as diatone, 0.84–0.90 × as long as the basal width of the pronotum (in Iraqi specimens 1.44–1.50 × and 0.87–0.97 × respectively). Unfortunately no males are known from Iraq for confirming the synonymy.

Biology: On *Lycium barbarum*.

Distribution: Apparently Irano-Turanian.

Glaucopterum adspersum (Schmidt, 1939)

Psallus adspersus Schmidt 1939:382.

Compsidolon (Chamaeliops) adspersum Wagner 1975a: 148–149.

Material: Safwan, 1 ex, 30.III.1981, Linnavuori.

Biology: On *Zygophyllum coccineum* in sandy habitats.

Distribution: Eremian, extending from the Spanish Sahara and Tunisia to Iraq.

Conostethus roseus (Fallén, 1829)

Material: Several exx from Ash Sharqat, 7.IV.1980; Darbandikhan, 13.V.1980; Jebel Sinjar, 8.V.1981; Sinoni, 8–9.V.1981, Linnavuori.

Biology: Among grasses and other plants in hilly steppes of northern Iraq.

Distribution: Euro-Siberian.

Conostethus venustus (Fieber, 1859)

Material: Many exx from Aqra, 12.V.1981; Brozah, 17.V.1981; Darbandikhan, 13.V.1980; Al Hadr, 6–7.V.1981; Khorsabad, 11.V.1981; As Salman-Shabakah, 4.IV.1981; Ash Sharqat, 7.IV.1980, Linnavuori.

Biology: In steppes.

Distribution: Holomediterranean.

Monocris longicornis Linnavuori, 1988

Types: Nasiriyah-Abu Ghar, ♂ holotype, numerous paratypes, 15.V.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On an unidentified halophyte in a salt marsh.

Distribution: Endemic.

Malthacosoma punctipennis Reuter, 1879

Malthacosoma halimocnemis (Becker, 1864) in Wagner 1975a:385–386, misidentification (*Capsus halimocnemis* Becker 1864:485 is a synonym of *Solenoxyphus fuscovenosus* Fieber, 1864, in Kerzhner & Jacewski 1964:752).

Material: Many exx from Amara, 18.VIII.1968, M. Kareem; Ana-Al Qaim, 5.V.1980; Baghdad, IV–VII.1980; Al Hadr, 6.V.1981; Haditha-Tikrit, 6.V.1980; Najaf-Shabakah, 23.VI.1981; Rawah-Al Hadr, 6.V.1981; Safwan, 30.III.1981, Linnavuori.

Colouring variable: Upper surface usually with fine or large dark dots, sometimes immaculate.

Biology: In steppes with grasses, Compositae and Astragalus. Between Haditha and Tikrit found on *Halocharis sulphurea*.

Distribution: Irano-Turanian, extending to Israel and Egypt.

Atomophora arabica Linnavuori, 1962

Material: Najaf-Shabakah, 1 ex, 23.VI.1981; 50 km S Nasiriyah, 1 ex, 14.IV.1980; Safwan, many exx, 13.IV.1980; Tharthar lake, 2 exx, 13.IX.1979; Ukhaydir-Nukhaib, 2 exx, 2.V.1980; Wadi Mandali, 1 ex, 29.IX.1979, Linnavuori.

Biology: At Tharthar lake found on *Calligonum comosum*. In Saudi Arabia common at lamps in *Rhanterium epapposum* steppes.

Distribution: Eremian (Arabian).

Camptotylidea alhagii (Linnavuori, 1986)

Atomophora alhagii Linnavuori 1986:155 (Linnavuori 1990:58–59).

Types: Iraq: near Ana, ♀ holotype, several paratypes, 8.X.1979; Tharthar lake, 1 paratype, 23.VIII.1979, Linnavuori. Saudi Arabia: Al Hasa, several paratypes, 24.X.1977, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Alhagi maurorum*.

Distribution: Eremian (Arabian).

Camptotylidea candida (Linnavuori, 1984)

Atomophora candida Linnavuori 1984:40–41 (Linnavuori 1990:59).

Types: Ukhaydir-Nukhaib, ♀ holotype, 3 paratypes, 2.V.1980; Nukhaib-km 160, several paratypes, 3.IV.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Ephedra foliata*.

Distribution: Endemic.

Camptotylidea astarte (Linnavuori, 1971)

Atomophora astarte Linnavuori 1971:3.

Taeniorhorus grandoculus Linnavuori 1984:43 (Linnavuori 1990:60–61).

Types: Israel: Eilat, ♂ holotype and 1 paratype of *astarte*, 10.V.1958, Linnavuori. Iraq: Nasiriyah-Abu Ghar, ♂ holotype and many paratypes of *grandoculus*, 15.IV.1980 and 31.III.1981, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Haloxylon persicum*.

Distribution: Irano-Turanian, extending from Israel and Saudi Arabia to Turkestan.

Camptotylidea fuscomaculata (Reuter, 1879)

Atomophora fuscomaculata Reuter 1879:291 (Linnavuori 1990:62).

Material: Ukhaydir-Nukhaib, 4 exx, 2.V.1980, Linnavuori.

Biology: On *Haloxylon persicum*.

Distribution: Irano-Turanian, extending from Saudi Arabia and Iraq to Central Asia.

Roudairea crassicornis Reuter, 1886

Material: Safwan, many exx, 13.IV.1980, Linnavuori.

Biology: On *Panicum turgidum* in sandy habitats.

Distribution: Eremian (Algeria – Iraq).

Opisthotaenia fulvipes Reuter, 1901

Material: Al Qosh, 3 exx, 10.V.1981, Linnavuori.

Biology: In hilly steppes. On Boraginaceae.

Distribution: Pontomediterranean.

Thermocoris rivalis (Horvath, 1894)

Material: Aqra, 6 exx, 12.V.1981; Brozah, 1 ex, 13.V.1981, Linnavuori.

T. rivalis consists of two known races, *T. rivalis rivalis* occurring in Armenia and *T. rivalis suctor* Seidenstücker inhabiting Turkey. They differ in the length of the rostrum which in the former extends to the basal margin of the mesonotum, in the latter much beyond the hind coxae. The Iraqi specimens seem to be intermediates, since the rostrum extends to the hind coxae or slightly beyond.

Biology: In hilly steppes of northern Iraq. Recorded from *Alkanna* in Turkey (Wagner 1975a:360).

Distribution: Anatolian.

Tinicephalus vicarius Linnavuori, 1984

Types: near Brozah, ♂ holotype, 2 ♀ paratypes, 13.V.1981, Linnavuori, in coll. Linnavuori (AMNH).

Biology: In steppes on hilly terrain. Vegetation consisting of different grasses, Papilionaceae and Labiateae.

Distribution: Endemic.

Amblytylus macedonicus Wagner, 1955

Material: Brozah, 4 exx, 13.V.1981; Al Hadr, 4 exx, 6–7.V.1981, Linnavuori.

Biology: On grasses in steppes of northern Iraq.

Distribution: Pontomediterranean, known from Slovakia, the Balkan Peninsula and Turkey.

Amblytylus gregarius Linnauori, 1961

Material: Several exx from Aqra, 12.V.1981; Brozah, 13.V.1981; Darbandikhan, 13.V.1980; Al Qosh, 10.V.1981; Shaykh Addi, 11.V.1981, Linnauori.

Biology: On grasses in hilly steppes of northern Iraq.

Distribution: Apparently Syrio-Anatolian, previously recorded from Israel.

Amblytylus concolor Jakovlev, 1877

Material: Numerous exx from Aqra, 12.V.1981; Brozah, 13.V.1981; Darbandikhan, 13.V.1980; Al Hadir, 6–7.V.1981; Jebel Sinjar, 8.V.1981; Al Qosh, 10.V.1981; Shaykh Addi, 11.V.1981; Sinjar, 7.V.1981; Sinoni, 8–9.V.1981, Linnauori.

Biology: On grasses in hilly steppes of northern Iraq.

Distribution: Pontomediterranean.

Amblytylus luridus Hoberlandt, 1961

Material: Several exx from Aqra, 12.V.1981; Brozah, 13.V.1981; Darbandikhan, 13.V.1980; Sinjar, 7.V.1981, Linnauori.

Biology: On grasses in hilly steppes of northern Iraq.

Distribution: Syrio-Anatolian.

Tythus parviceps (Reuter, 1890)

Material: Amara, 1 ex, 23–24.X.1979; Ana, 1 ex, 8.X.1979; Baghdad, 4 exx, V–VII.1980; Jalula, 1 ex, 27.XI.1979; Mosul, 2 exx, 28.VIII.1980; Sawa lake, 1 ex, 21.X.1979, Linnauori.

Biology: On Cyperaceae and grasses in moist localities.

Distribution: Intertropical.

Ectagela guttata Schmidt, 1939

Material: Numerous exx from Ain Al Tamar, 17.V.1980; Ana, 8.X.1979; Abu Ghar-Busaya, 1.IV.1981; Baghdad, IV–VIII.1980; Busaya-As Salman, 2.IV.1981; Nasiriya, 22.X.1979, Linnauori.

Biology: On *Zizyphus spina-christi*. At lamps.
Distribution: Eremian; known from Egypt.

Ectagela aspera Linnauori, 1984

Types: Sarsang, ♂ holotype, ♀ paratype, 26–28.VIII.1980, Linnauori, in coll. Linnauori (AMNH).

Biology: At lamp on a mountain slope. Vegetation containing oaks, grasses and Compositae.

Distribution: Endemic.

Yotvata (Yotvata) picticornis (Horvath, 1913)

Material: Najaf-Shabakah, 10 exx, 23.VI.1981, Linnauori.

Biology: On *Acacia*.

Distribution: Eremian (Algeria-Iraq).

Yotvata (Yotvata) nergal Linnauori, 1984

Type: Baghdad, ♂ holotype, IV–V.1980, Linnauori, in coll. Linnauori (AMNH).

Biology: At lamp.

Distribution: Endemic.

Yotvata (Godataira) salmana Linnauori, 1984

Types: As Salman-Takhadid, ♂ holotype, ♀ paratype, 17.IV.1980, Linnauori, in coll. Linnauori (AMNH).

Biology: Swept from vegetation in a small gravelly wadi.

Distribution: Endemic.

Yotvata (Godataira) pulcherrima Linnauori, 1984

Types: near Dukan, ♂ holotype, several paratypes, 12.VI.1980; Salahuddin, 1 paratype, 12.VI.1980; Sarsang, 1 paratype, 26–28.VIII.1980, Linnauori, in coll. Linnauori (AMNH).

Material: Aqra, 3 exx, 29.VIII.1980, Linnauori.

Biology: On *Quercus aegilops*. At Aqra on *Vitex agnus-castus*.

Distribution: Endemic.

Compsidolon (Compsidolon) elegantulum
Reuter, 1900

Material: Many exx from Gully Ali Beg, 13.VI.1980; Jebel Sinjar, 14.XI.1979; Al Qosh, 17.XI.1979; Sarsang, 26–28.VIII.1980, Linnauori.

Biology: On *Parietaria* on steep mountain precipices.

Distribution: Syrian, previously known from Syria, Israel and Jordan.

Compsidolon (Coniortodes) alibeganum
Linnavuori, 1984

Types: Gully Ali Beg, ♂ holotype, 2 ♀ paratypes, 13.VI.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: In a luxuriant deciduous forest on precipices of a mountain river valley.

Distribution: Endemic.

Compsidolon (Coniortodes) ishmedagan
Linnavuori, 1984

Types: near Salahuddin, ♂ holotype, many paratypes, 12–14.VI.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On an unidentified Labiateae on slopes of a calcareous hill.

Distribution: Endemic.

Compsidolon (Apsinthophylus) bipunctatum
Wagner, 1975

Material: Rutba-Al Qaim, many exx, 4–5.V.1980, Linnavuori.

Biology: On *Artemisia herba-alba*.

Distribution: Syrian, previously known from Syria.

Compsidolon (Apsinthophylus) sabulicola
Linnavuori, 1984

Types: Ukhadir-Nukhaib, ♂ holotype, many paratypes, 2.V.1980, 7.IV.1981, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Artemisia monosperma* in inland dunes.

Distribution: Eremian (Arabian), also known from Saudi Arabia.

Compsidolon (Apsinthophylus) balachowskii
Wagner, 1958

Material: Numerous exx from Abu Ghar-Busaya, 1.IV.1981; Rutba-Al Qaim, 4–5.V.1980; As Salman, 18.IV.1980; As Salman-Samawa, 16.IV.1980; As Salman-

Shabakah, 4.IV.1981; As Salman-Takhadid, 16.VIII.1980; Shabakah-Waqisah, 5.IV.1981, Linnavuori.

Biology: On *Artemisia herba-alba*.

Distribution: Eremian, extending from North Africa to Iraq.

Compsidolon (Apsinthophylus) qoshanum
Linnavuori, 1984

Types: Al Qosh, ♂ holotype, 5 paratypes, 17.XI.1979, Linnavuori, in coll. Linnavuori (AMNH).

Biology: From herbs on precipices of a mountain valley.

Distribution: Endemic.

Psallus (Apocremnus) syriacus Wagner, 1956

Psallus (Apocremnus) ancorifer syriacus Wagner 1956b: 206–207.

Psallus (Apocremnus) syriacus Kerzhner & Jaczewski 1964:756.

Material: Several exx from Aqra, 12.V.1981; Brozah, 13.V.1981; Darbandikan, 13.V.1980; Gully Ali Beg, 2 ♀♀, 13.VI.1980, Linnavuori.

Biology: In hilly steppes of northern Iraq. In Crimea found on *Alyssum*.

Distribution: Syrio-Anatolian, recorded from Israel, Syria, Turkey, and Crimea.

Psallus (Psallus) pseudopunctulatus
Linnavuori, 1984

Types: Jebel Sinjar, ♂ holotype, many paratypes, 8.V. 1981; near Salahuddin, 1 paratype, 16.VI.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Quercus*.

Distribution: Endemic.

Psallus (Psallus) deserticola Wagner, 1951

Figs. 5e–d, 6a–c, 7b–h

Maurodactylus pictus Wagner 1975c:274–276, syn. n.

Types: Syria: 40 km SW Deir Es Zor, 3 paratypes of *pictus*, 15.V.1974, Eckerlein, in coll. Linnavuori (AMNH).

Material: Iraq: Rawah-Al Hadir, 9 exx, 6.V.1981, Linnavuori. Israel: Many exx from 'Ein Avdat, 10.VIII.1986; Hazerim, 30.IV.1986; Revivim, 21.IV.1986, Linnavuori. Egypt: Cairo-Suez desert road, numerous exx, 14–15.IX. 1962, Linnavuori; Wadi Umm Assad, 2 exx (topotypic), 14.X.1934, Priesner.

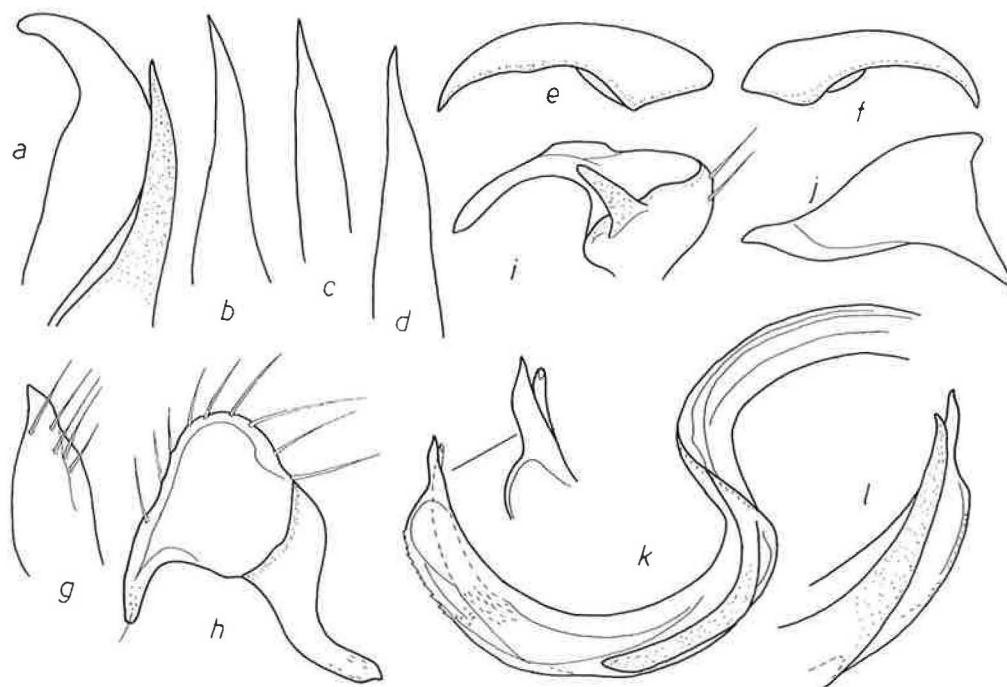

Fig. 5. *Psallopsis bisulcis* Linnavuori. a: apex of vesica (ex from Turkestan) in ventral view; b–d: lower sclerotized process of vesica (ex from Nasirya and of two exx from Tharthar lake). — *Psallus deserticola* Wagner. e–f: claw (exx from Egypt and Rawah-Al Hadr); g: right style; h–i: left style from above and in lateral view; j: theca; k–l: vesica (ex from Rawah-Al Hadr) in lateral view.

Description: Length 3.25–4.0 mm. Color variable. Ground color pale grayish or orangish. 1st antennal joint black, others yellowish. Males: In darkest specimens head, pronotum and scutellum blackish brown, clavus with obscure brown spot, apex of corium with transverse dark band, apical part of cuneus brownish. In pale specimens head, pronotum and scutellum yellowish, transverse band on apex of corium brownish, cuneus uniformly pale. Females: Dark specimens: head yellowish with reddish lateral arcs; pronotum and scutellum dark brown, elytra with dark spot extending from clavus to adjacent part of corium, broad blackish band across apex of corium, cuneus apically darkened. Pale specimens: head, pronotum and scutellum pale, dark band across apex of corium, apex of cuneus

slightly darkened. All forms are connected with intermediates. Legs pale ochraceous. Femora with brown irroration, hind femora ± darkened, sometimes even blackish brown. Tibiae with small dark spots which diminish in size towards the apex, tibial spines pale brown. — Vestiture: Upper surface with semierect pale hairs and dense appressed whitish yellow pubescence which is often worn out. 3rd hind tarsomere a little longer than 2nd. Other external characters in the original descriptions and illustrations (Figs. 5e–f, 7b–h). — Male genitalia in Figs. 5g–l, 6a–c. Vesica incrassate, apical part broadly curved, subapically finely dentate, apex bifid; gonopore subapical, poorly delimited.

Wagner (1975c:274–276) placed the species (as *pictus*) in the genus *Maurodactylus* Reuter,

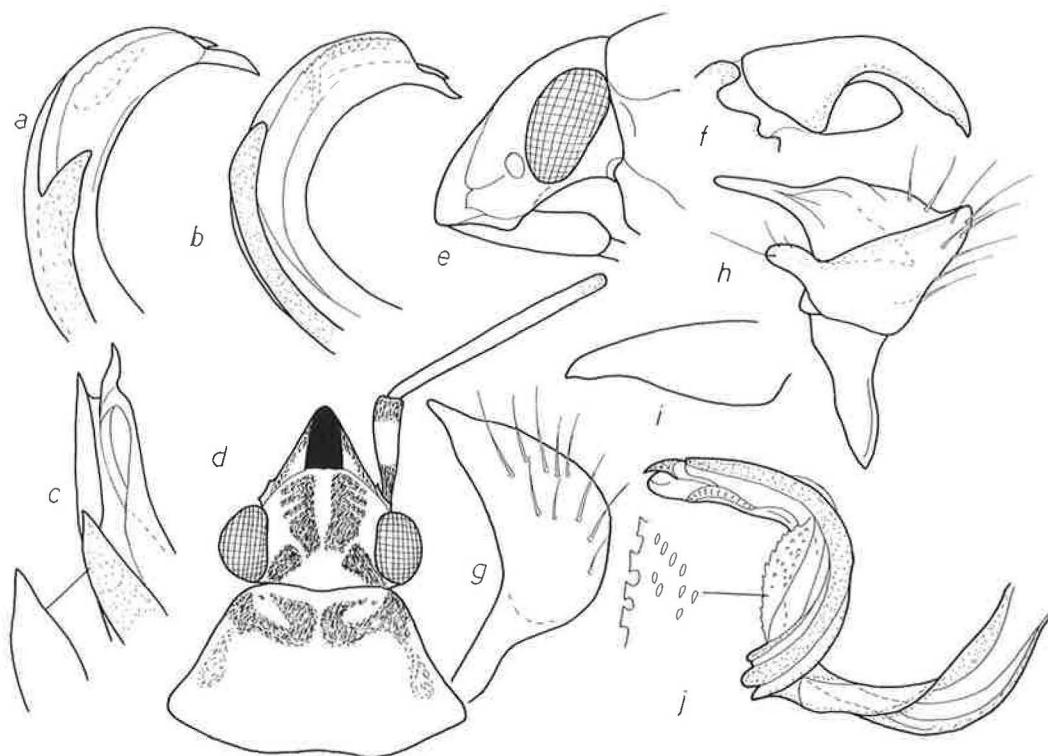

Fig. 6. *Psallus deserticola* Wagner. a–b: apex of vesica (ex from Rawah-Al Hadr and Egypt), lateral view; c: apex of vesica (ex from Egypt) in ventral view. — *Chlorillus pictoides* Wagner. d: male head and pronotum in dorsal view; e: head in lateral view; f: claw; g: right style; h: left style; i: theca; j: vesica in lateral view.

1878 (type species: *Phytocoris albidus* Kolenati) of which the following species preserved in coll. Linnavuori were examined: *M. acanthophytii* Puchkov, *M. albidus* (Kolenati), *M. alutaceus* (Fieber), *M. fulvus* (Reuter), *M. gomerensis* Wagner, *M. kukuensis* Puchkov, and *M. nigrigenis* (Reuter). These differ from *P. deserticola* in the following points:

- 1) Body smaller and in males especially, much more gracile, elongate and parallel-sided.
- 2) Elytra always uniformly pale.
- 3) Tibial spines long and black; tibiae immaculate save for very small dark dots at base of spines (most distinct in *acanthophytii* and *kukuensis*).
- 4) Hair covering of upper surface simple pale or black (*acanthophytii* and *kukuensis*), only in

M. kukuensis appressed silvery hairs also present.

5) Structure of vesica different.

Consequently *deserticola* does not seem to be congeneric with the *Maurodactylus* species and is therefore left in the crowded genus *Psallus* Fieber, where it does have a separate position, as pointed out by Wagner (1951:159–161).

Wagner (1975c:274–276) also suggested that the species could belong to the genus *Damioscea* Reuter, 1883 (type species: *Oncotylus komaroffi* Jakovlev), but that genus does not belong to the *Maurodactylus* group, from which it differs in several basic characters: 1. Legs much longer and more gracile. 3rd hind tarsomere shorter than 2nd. Pulvilli (Fig. 8e) large, extending to near apical third of claw. 4. Structure of vesica dis-

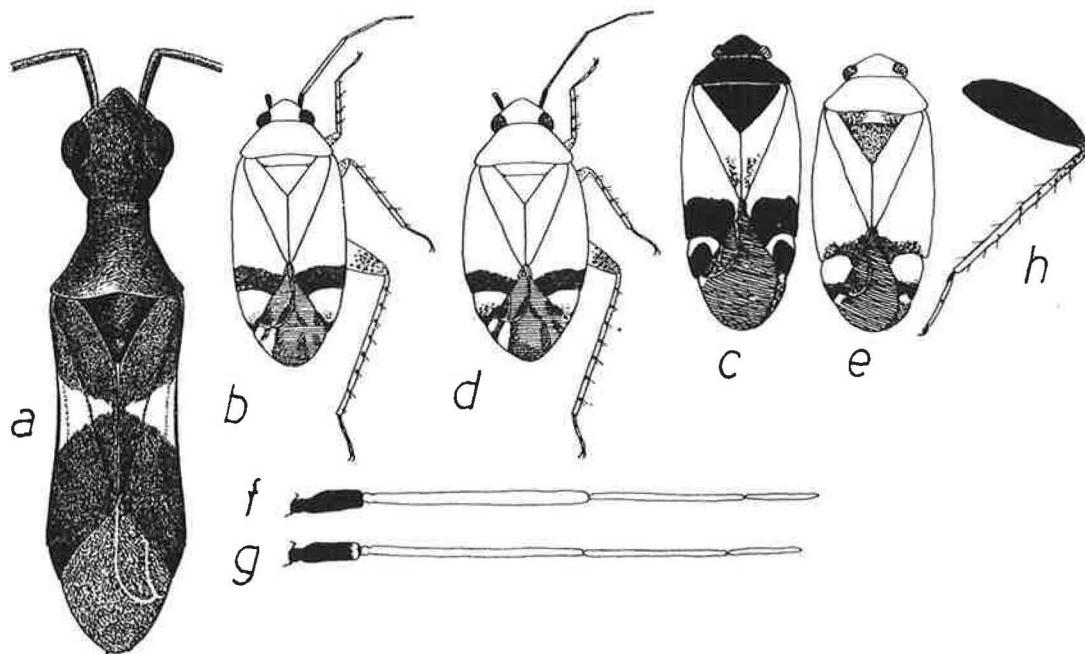

Fig. 7. *Alloeomimus kurdus* Hoberlandt. a: male in dorsal view. — *Psallus deserticola* Wagner. b—c: pale and dark male; d—e: pale and dark female; f—g: male and female antenna; h: hind leg of a dark specimen. — After Hoberlandt 1953 and Wagner 1951 and 1975c.

similar (Fig. 8j). *Damioscea* is undoubtedly a member of the *Megalocoleus* group in which it was correctly placed by Kerzhner and Jaczewski (1964:754). A redescription of *D. komaroffi* is published below.

D. komaroffi (Jakovlev, 1881)

Fig. 8

Type: Russia: Dagestan, ♂ syntype, in coll. Reuter in Mus. Helsinki.

Description: Length 4.5–4.8 mm. Shiny. Pale yellowish green. Head yellowish. Eyes dark brown. 1st and 2nd antennal joints (others missing) dark brown. Membrane of elytra hyaline, immaculate. — Male: Body elongate, parallel-sided. Hair covering of upper surface simple, dark. Head 0.68 × as broad as basal width of pronotum, in apical view 1.3 × as broad as high, in lateral view 1.14 × as long as high; antennal pits close to lower corners of eyes; base of vertex

immarginate; ocular index 1.15. Antennal joints 1 and 2 incrassate, hair covering semierect, 1st joint 0.33 × as long as diatone, 2nd 1.54 × as long as diatone, 1.04 × as long as basal width of pronotum. Rostrum extending to base of abdomen. Pronotum trapezoidal, strongly broadening caudad, 2.1 × as broad as long in middle, lateral margins straight, disc weakly convex. Elytra much longer than abdomen. Legs long and gracile; hind tibia 1.9 × as long as basal width of pronotum, tibial spines black, longer than tibial diameter; proportions between hind tarsomeres 12:26:19.

Male genitalia in Fig. 8f–j.

Distribution: Caspian.

Psallus (Asthenarius) melpomene Linnaviuori, 1989

Asthenarius melpomene Linnaviuori 1989:53.

Type: Jebel Sinjar, ♀ holotype, 8.V.1981, Linnaviuori, in coll. Linnaviuori (AMNH).

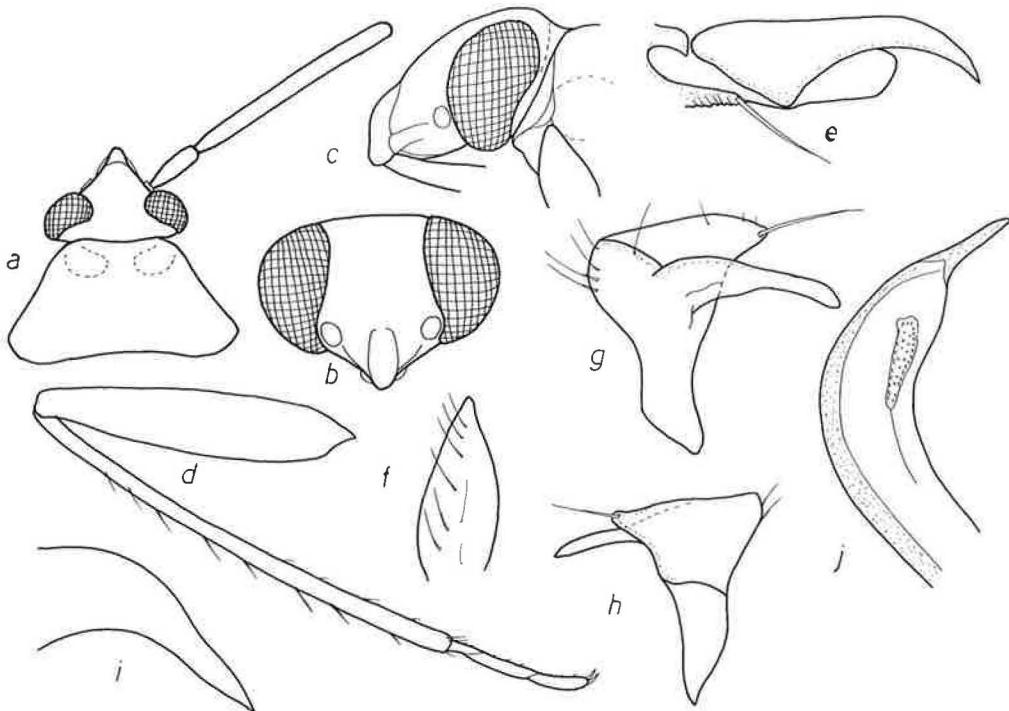

Fig. 8. *Damioscea komaroffi* (Jakovlev). a: head and pronotum; b–c: head in apical and in lateral view; d: hind leg; e: claw; f: right style; g–h: left style; i: theca; j: apex of vesica.

Biology: On *Quercus*.

Distribution: Endemic.

Psallus (Asthenarius) ninurta Linnauori 1984

Asthenarius ninurta Linnauori 1984:50–51.

Type: near Dukan, ♂ holotype, 12.VI.1980, Linnauori, in coll. Linnauori (AMNH).

Biology: On *Quercus aegilops*.

Distribution: Endemic.

Nanopsallus carduellus (Horvath, 1888)

Material: Several exx from Jebel Sinjar, 8.V.1981; Salahuddin, 12.VI.1980; Sarsang, 26–28.VIII.1980; Sawarah Tuka, 28.VIII.1981, Linnauori.

Biology: On *Cirsium acarna* in hilly habitats.

Distribution: Pontomediterranean.

Chlorillus pictoides Wagner, 1964

Fig. 6d–j

Material: Jebel Sinjar near Sinoni, 8.V.1981, 2 exx; Al Qosh, 6 exx, 10.V.1981, Linnauori.

Biology: In hilly steppes of northern Iraq. In Syria found on *Salvia acetabulosa* (Wagner 1975a:10).

Distribution: Syrian, recorded only from Syria.

Pararagmus annulicornis (Reuter, 1879)

Recorded from Badawa, Erbil (Hoberlandt 1949:9).

Distribution: Irano-Turanian.

Plagiognathus (Plagiognathus) bipunctatus
Reuter, 1883

Material: Numerous exx from Aqra, 12.V.1981; Baghdad, IV–V.1980; Brozah, 13.V.1981; Darbandikhan, 13.V.1980; Gully Ali Beg, 13.VI.1980; Al Hadr-Sinjar, 7.V.1981; Halabja, 11.VI.1980; Jebel Sinjar, 8.V.1981; Khorsabad, 11.V.1981; Al Qosh, 10.V.1981; Safwan, 13.IV.1980; Sinjar, 7.V.1981; Sinoni, 8–9.V.1981, Linnavuori.

Biology: In steppes. Also found on *Mentha* in moist localities.

Plagiognathus (Plagiognathus) chrysanthemi
(Wolff, 1864)

Material: Aqra, 1 ex, 12.V.1981; Darbandikhan, several exx, 13.V.1980, Linnavuori.

Biology: In steppes.

Distribution: Holarctic.

Plagiognathus (Plagiognathus) fulvipennis
(Kirschbaum, 1856)

Material: Many exx from Abu Ghraib, 12.IV.1977, Waiel; Brozah, 13.V.1981; Darbandikhan, 13.V.1980; Dukan, 12.VI.1980; Gully Ali Beg, 13.VI.1980; Salahuddin, 13–14.VI.1980, Linnavuori.

Biology: In hilly steppes of northern Iraq.

Distribution: Holomediterranean.

Genus *Badezorus* Distant

Badezorus Distant 1910:15. Type species: *B. tyrianus* Distant.

Chamaepsallus Wagner 1965:85–86. Type species: *Atomoscelis tomentosus* Reuter, syn. n.

The synonymy was established after examining the type specimens of *Badezorus tyrianus* Distant in the British Museum.

Badezorus signaticornis (Reuter, 1904), comb. n.

Atomoscelis signaticornis Reuter 1904:20.

Chamaepsallus signaticornis Wagner 1965:86.

Badezorus tyrianus Distant 1910:283, syn. n.

Types: Pakistan, Lahore, Punjab, ♀ lectotype (designated by Schuh) of *tyrianus*, ♂ syntype, 9.V.1908, N.A., in the British Museum.

Material: Many exx from Ain Al Tamar, 17.VI.1980; Ana, 8.X.1979; Baghdad, IV–VIII.1980; Haditha, 13.VIII.1979; Mosul, 28.VIII.1980; Najaf-Shabakah, 1.V.1980;

Nasiriyah-Abu Ghar, 29.VI.1980; Al Qosh, 25.VIII.1980; Rutba-Al Qaim, 4.V.1980; As Salman, 18.IV.1980; As Salman-Shabakah, 4.IV.1981; As Salman-Samawa, 16.IV.1980; Sinjar, 7.V.1980; Waqisah, 1.V.1980, Linnavuori.

Biology: On herbaceous desert plants such as *Aerva javanica*, *Arnebia hispidissima* and *Heliotropium*.

Distribution: Eremian, extending from the Cape Verde Islands to Iran and Pakistan.

Badezorus tomentosus (Reuter, 1904), comb. n.

Atomoscelis tomentosus Reuter 1904:21.

Chamaepsallus tomentosus Wagner 1965:74–92.

Material: Many exx from Ana, 8.X.1974; Baghdad, IV–VIII.1980; Al Hadir, 6–7.V.1981; Najaf-Shabakah, 1.V.1980, 23.VI.1981; 50 km S Nasiriyah, 14.IV.1980; Nukhayb-km 160, 8.IV.1981; Safwan, 25.VI.1980; As Salman, 18.IV.1980; As Salman-Takhadid, 18.IV.1980; Az Zubayr, 14.IV.1980, Linnavuori.

Biology: In desert habitats on *Heliotropium*.

Distribution: Eremian, extending from Egypt to Iraq.

Atomoscelis onustus (Fieber, 1861)

Material: Numerous exx from Ain Al Tamar-Ramadi, 20.IV.1980; Ana, 10.IV.1981; Ana-Al Qaim, 5.V.1980; Baghdad, V–VII.1980; Najaf-Shabakah, 23.VI.1981; Sawa lake, 9.IV.1980; Sinjar, 7.V.1981, Linnavuori.

Biology: On *Atriplex halimus* in saline habitats.

Distribution: Holomediterranean.

Salicarius urnammu Linnavuori, 1984

Types: Halabja, ♂ holotype, 10 paratypes, 11.VI.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Salix* sp.

Distribution: Endemic.

Sthenaropsis convolvuli Linnavuori, 1984

Types: near Safwan, ♂ holotype, numerous paratypes, 13.IV.1980 and 30.III.1981; several paratypes from Abu Ghar, 16.IV.1980, and Az Zubayr, 14.IV.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Convolvulus oxyphyllus*.

Distribution: Eremian (Arabian), also known from Saudi Arabia.

Maurodactylus nigrigenis (Reuter, 1890)

Campylognathus nigrigenis Reuter 1890:258.

Maurodactylus orientalis Wagner 1961a:309–313 (Linnavuori 1986:177).

Material: Several exx from Basra, 13.IV.1980; Ana-Al Qaim, 5.V.1980; Al Hadr, 6.V.1981; Safwan, 13.IV.1980, 30.III.1981; Waqisah, 1.V.1980, Linnavuori.

Biology: On desert plants and shrubs such as *Calligonum comosum*, *Fagonia indica*, *Francoeuria crispa*, and *Artemisia herba-alba*.

Distribution: Eremian, extending from North Africa to Central Asia.

Campylomma diversicornis Reuter, 1878

Material: Numerous exx from Abu Ghar-Busaya, 1.IV.1981; Ain Al Tamar, 17.VII.1980; Amara, 23–24.X.1979; Ana, 5.X.1979; Ana-Al Qaim, 5.V.1980; Aqra, 29.VIII.1980; Baghdad, V–VI.1980; Busaya, 2.IV.1981; Busaya-As Salman, 2.IV.1981; Falluja, 5.X.1979; Al Hadr, 6–7.V.1981; Jebel Sinjar, 8.V.1981; Karbala-Ain Al Tamar, 20.X.1979; Khan Ruhabah, 6.IV and 24.VI.1981; Khorsabad, 10.V.1981; Mosul, 28.VIII.1980; Najaf-Shabakah, 1.V.1980; Nukhayb-km 160, 8.IV.1981; Al Qosh, 10.V.1981; Safwan, 13.IV.1979; As Salman, 3.IV.1981; As Salman-Shabakah, 16.IV.1981; Sarsang, 25–28.VIII.1980; Sawa lake, 20.X.1979; Shaykh Addi, 11.V.1981; Sinjar, 14.XI.1979; Sinoni, 8–9.V.1981; Tharthar lake, 23.VIII.1979; Ukhaydir-Nukhayb, 2.V.1980; Wadi Mandali, 29.IX.1979; Az Zubayr, 14.IV.1980, Linnavuori; Bishapur, 1.IX.1930 and Belek Sindjar, VIII. 1931 (Hoberlandt 1949:9).

Biology: One of the commonest mirid species in Iraq. In semideserts and steppes on plants such as *Artemisia herba-alba*, thistles and *Vitex agnus-castus*.

Distribution: Irano-Turanian.

Campylomma simillima Jakovlev, 1882

Recorded from Shaqlawa (Hoberlandt 1953: 379).

Distribution: Irano-Turanian.

Campylomma annulicornis (Signoret, 1865)

Material: Halabja, 5 exx, 11.VI.1980, Linnavuori.

Biology: On *Salix* sp.

Distribution: Holomediterranean.

Campylomma incerta Villiers, 1956

Campylomma minima Wagner 1960:94–96, syn. n.

Campylomma verticata Wagner 1961b:320–322, syn. n.

Type: Mauritania, Chinquette, ♂ holotype of *incerta*, 4–5.III.1951, Dekeyser & Villiers, in Mus. Paris.

Material: Iraq: Abu Ghar, 1 ex, 16.IV.1980; Ain Al Tamar-Ramadi, 1 ex, 20.IV.1980; Najaf-Shabakah, 1 ex, 23.VI.1981; Rutba-Al Qaim, 2 exx, 5.IV.1981; As Salman-Takhadid, 1 ex, 17.IV.1980; Waqisah, 1 ex, 1.V.1980, Linnavuori. Kuwait: Al Jahra, 1 ex, 17.III.1981; As Salimiyah, 1 ex, 15–16.III.1981, Linnavuori.

Biology: On desert plants and shrubs such as *Dipterygium glaucum*, *Lycium* and *Zizyphus*.

Distribution: Eremian, extending from North Africa to Iraq.

Campylomma unicolor Poppius, 1914

Campylomma impicta Wagner 1956:7–9 (Linnavuori 1986:163).

Material: Many exx from Ain Al Tamar, 17.VII.1980; Baghdad, IV–VIII.1980; Falluja, 5.X.1979; Khan Ruhabah, 24.VI.1981; Najaf-Shabakah, 23.VI.1981; Sawa lake, 21.X.1979, Linnavuori.

Biology: In fields and desert habitats. On cultivated plants and natural vegetation such as *Acacia*, *Zizyphus*, *Artemisia herba-alba*, and *Suaeda pruinosa*.

Distribution: Holosudanese with a wide range in the Eremian subregion.

Campylomma lindbergi Hoberlandt, 1952

Material: Baghdad, 3 exx, V–VII.1980; Shaykh Addi, 1 ex, 11.V.1981, Linnavuori.

Biology: A specimen from Turkestan in coll. Linnavuori was found on *Pistacia vera*.

Distribution: Possibly Anatolian, known from Cyprus and Turkestan.

Auchenocrepis alboscutellata Puton, 1874

Material: Kuwait: Al Jahra, 2 exx, 17.III.1981, Linnavuori.

Biology: On *Tamarix*.

Distribution: Eremian, extending from North Africa to Iran.

Auchenocrepis reuteri Jakovlev, 1878

Material: Several exx from Amara, 23–24.X.1979; Ana, 8.X.1979; Ana-Al Qaim, 5.V.1980; Baghdad, VI–VII.1980; Hilla, 21.IX.1979; Hit, 8.X.1979; Nasiriyah, 22.X.1979; Al Qaim, 10.X.1979; Samawa, 21.X.1979; Tharthar lake, 23.VI.1980, Linnavuori; Karagan near Hanekin, Djebel Hamrin, 6.VII.1931 (Hoberlandt 1949:9).

Biology: On *Tamarix*.

Distribution: Pontomediterranean.

Tuponia (Tuponia) tamaricicola Lindberg, 1939

Material: Ain Al Tamar, 1♀ probably of this species, 17.VII.1980, Linnavuori.

Biology: On *Tamarix*.

Distribution: Eremian, extending from North Africa to Iran.

Tuponia (Tuponia) persica Wagner, 1957

Material: Baghdad, 1 ex, IV–V.1980; Tharthar lake, 2 exx, 23.VIII.1979, Linnavuori.

Biology: On *Tamarix*.

Distribution: Iranian.

Tuponia (Tuponia) ayasensis Wagner, 1963

Material: Iraq: many exx from Ana-Al Qaim, 5.V.1980; Baghdad, VI–VII.1980; Nasiriyah-Abu Ghar, 5.V.1980, Linnavuori. Palestine: Jericho, 2 exx, 5.V.1962, Eckerlein, in coll. Linnavuori (AMNH).

Biology: On *Tamarix*.

Distribution: Syro-Anatolian, recorded from Turkey.

Tuponia (Tuponia) nindhursag Linnavuori, 1984

Types: Ana-Al Qaim, ♂ holotype, numerous paratypes, 5.V.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Tamarix* in a small river valley.

Distribution: Endemic.

Tuponia (Tuponia) ninlil Linnavuori, 1984

Types: Nasiriyah-Abu Ghar, ♂ holotype, many paratypes, 15.IV.1980; Basra, 1 paratype, 12.IV.1980; Safwan, 3 paratypes, 30.III.1981, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Tamarix* in salt marshes.

Distribution: Endemic.

Tuponia (Tuponia) carayoni vulnerata

Linnavuori, 1961

Tuponia lethierryi vulnerata Linnavuori 1961:24–25.

Tuponia vulnerata Drapolyuk 1980:54–55.

Tuponia carayoni vulnerata Linnavuori 1986:183.

Material: Many exx from Ana-Al Qaim, 5.V.1980; Baghdad, VI–VII.1980; Basra, 12.IV.1980; Najaf-Shabakah, 1.V.1980; Rutba-Al Qaim, 4.V.1980; Tharthar lake, 2.VI.1980, Linnavuori.

Biology: On *Tamarix*.

Distribution: Pontomediterranean.

Tuponia (Chlorotuponia) guttata Wagner, 1950

Tuponia guttata Wagner 1950:147–149.

Tuponia variegata Wagner 1958:11 (Linnavuori 1986:186).

Material: Dawra, 6 exx, 15.IV.1979, Linnavuori.

Biology: On *Tamarix*.

Distribution: Eremian (Egypt – Iran).

Tuponia (Chlorotuponia) shulgi Linnavuori, 1984

Types: Baghdad, ♂ holotype, 1 paratype, IX.1979, 1 paratype, VI–VII.1980, Linnavuori, in coll. Linnavuori (AMNH).

Biology: At lamps.

Distribution: Endemic.

Tuponia (Chlorotuponia) angusta Wagner, 1957

Material: Ana, 7 exx, 8.X.1979; Hit, 3 exx, 8.X.1979, Linnavuori.

Biology: On *Tamarix*.

Distribution: Iranian, previously recorded from Iran.

Tuponia (Chlorotuponia) concinna (Reuter, 1875)

Atomoscelis concinnus Reuter 1875:57.

Tuponia conspersa Reuter 1901:193 (Linnavuori 1986: 188).

Tuponia conspersa fezzana Wagner 1971:120 (Linnavuori 1986:188).

Tuponia anguela Wagner 1975b:152–153 (Linnavuori 1986:188).

Material: Numerous exx from Ain Al Tamar, 17.VII.1980; Amara, 23–24.X.1979; Ana-Al Qaim, 8.X.1979, 5.V.1980, 10.IV.1981; Baghdad, VI–VIII.1980; Haditha,

13.VIII.1979; Hilla, 21.IX.1979; Hit, 8.X.1979; Karbala-Ain Al Tamar, 20.X.1979; Nasiriyah, 22.X.1979; Nasiriyah-Abu Ghar, 15.IV.1980; Wadi Mandali, 29.IX.1979, Linnavuori.

Biology: On *Tamarix*. In Saudi Arabia also found on *Zygophyllum*.

Distribution: Eremian (Algeria – Turkestan).

Tuponia (Tuponia) punctipes Reuter, 1879

Material: Numerous exx from Abu Ghuraib, 28.VI.1977, Waiel; Ain Al Tamar, 17.VII.1980; Baghdad, IV–VIII.1981; Al Hadr, 6–7.VIII.1981; Rawah-Al Hadr, 6.V.1981; Razazah lake, 24.VI.1981, Linnavuori.

Biology: On *Tamarix*.

Distribution: Irano-Turanian; recorded from Iraq, Belek Sindjar (Hoberlandt 1949:9).

Tuponia (Chlorotuponia) alhagicola shamash Linnavuori, 1984

Tuponia (Chlorotuponia) shamash Linnavuori 1984:57.

Tuponia (Chlorotuponia) alhagicola shamash 1986:191.

Types: Ana-Al Qaim, ♂ holotype and many paratypes, 9.X.1979; several paratypes from Baghdad, VIII.1980; Amara, 23–24.X.1979; Falluja, 5.X.1979; Sawa lake, 20.X.1979, Linnavuori, in coll. Linnavuori (AMNH).

Biology: On *Alhagi maurorum*, also found on *Zygophyllum* and *Salsola pseudonitraria*.

Distribution: Endemic, also known from Al Hasa in Saudi Arabia. The nominate form *T. alhagicola alhagicola* Drapolyuk is known from Turkestan.

Tuponia (Chlorotuponia) kermanensis Wagner, 1958

Tuponia nana Wagner 1960:134–136 (Linnavuori 1986: 191).

Material: Several exx from Amara, 23–24.X.1980; Basra, 12.IV.1980; Falluja, 5.X.1979; Karbala-Ain Al Tamar, 20.X.1979; Nasiriyah-Abu Ghar, 15.IV.1980, Linnavuori.

Biology: On *Salsola* sp.

Distribution: Eremian, known from the Sudan, Saudi Arabia and Iran.

Tuponia (Chlorotuponia) minima Wagner, 1957

Material: Amara, 8 exx, 23–24.X.1979, Linnavuori.

Biology: On *Salsola pseudonitraria*.

Distribution: Eremian, extending from Egypt to Iran.

Aphaenophyes richteri (Wagner, 1957)

Material: Numerous exx from Iraq: Baghdad, VI–VII.1980; Basra, 12.IV.1980; Hilla, 21.IX.1979; Karbala-Ain Al Tamar, 20.X.1979; As Salman, 19.IV.1980; As Salman-Takhadid, 18.IV.1980; Wadi Mandali, 29.IX.1979; Az Zubayr, 28.II.1980, Linnavuori. Kuwait: Al Jahra, 17.III.1981, Linnavuori.

Biology: On *Tamarix*.

Distribution: Eremian.

Camptotylus yersini (Mulsant & Rey, 1856)

Material: Ana, 1 ex, 8.X.1979; Dawra, several exx, 15.IX.1979; Falluja, 1 ex, 5.X.1979, Linnavuori.

Biology: On *Tamarix*.

Distribution: Holomediterranean.
