

Corrigenda

Because of a technical mistake, the illustration (Figs. 1–4) in the article “*Hyphydrus megas* n.sp. (Coleoptera: Dytiscidae), described from

the Democratic Republic of Congo and Tanzania” by Olof Biström, and published in *Entomologica Fennica* 11: 137–139 (2000) was distorted. The correct illustration is thus reproduced here.

Figs. 1–4. *H. megas* sp. n. (holotype). — 1, habitus; 2, penis, dorsal aspect; 3, penis, lateral aspect; 4, paramere. Scales 1 mm.
