### KONFERENSSIT/CONFERENCES

**MIE2021, 29.–31.5 2021**

#### Virtual conference Public Health and Informatics

For the last years, the application of eHealth applications and the Digitalization was an important and fundamental paradigm changer in the era of Health Informatics and Public Health. Massive amount of data from the molecular biology associated with massive data about the environment, behaviour and lifestyle, exposition factors and personal records, the rise of unprecedented processing power in health information systems and artificial intelligence as well as health analytics methods and tools empowered Medicine, Nursing and Healthcare sciences are facing the Public Health challenges.

#### Special tracks with European initiatives and projects...

In this 31st annual experience, we will have special tracks with European projects, such as FAIR4HEALTH and standardizing organizations, such as HL7, and discuss the building of global frameworks to improve data usability to support life science research across borders, systems, and languages. Specific tracks devoted to encryption, blockchain and privacy-conscious data sharing, along with ethical and legal experts, will investigate and propose practical way to support innovation to alleviate the burden of diseases such as COVID-19, cancers and promote bio-surveillance networks for example.

#### Involving patients...

Involving patients and citizens will also be at the centre of the debates, along with European pro-

jects, patients' organizations, and patient-partners' groups, to discuss innovative ways to reach an active involvement and participation that can leverage the field.

#### Involving private partners...

And, of course, not to forget the prolific results of the public-private convergence, with the presence of the whole range of public organizations to private partners, from young start-ups recently born from talented young entrepreneurs to global companies and other non-profit international organizations active in the field of life science and information technologies.

Deadline for Full papers and Short Communication papers / Posters 15.1.2021

#### e-Health 2020 Virtual PopUp | Monday, July 20 and Tuesday, July 21

The e-Health Virtual PopUp is an interactive online event bringing together digital health professionals from across Canada. Just like the traditional e-Health Conference, the e-Health Virtual PopUp promises to be an engaging, lively learning experience, but... due to physical distancing recommendations put in place to reduce the spread of COVID-19, it will take place online instead of at a physical location.
