HIC 2018 Sydney, Australia 29.7-1.8.2018

HISA Australia's digital health community invites you to be part of our 25th year anniversary celebration at our annual conference HIC 2018. With delegates from all over Australia gathering to share the latest digital health research, case studies, trends and technology advances, HIC is Australia's premier digital health, health informatics and e-health conference and expo.

HIC is the place for thought leadership: We bring together the latest innovations and research, practical case studies, and forward thinking towards a connected and joined-up health system.

HIC 2018 focuses on connecting the system, being smart with data, and enhancing the practitioner and consumer experience in healthcare interactions.

HIC 2018 provides the ideal professional and social environment for clinicians, researchers, health IT professionals, industry and consumers to integrate, educate and share their knowledge to drive innovative thinking, to enhance services and allow greater consumer involvement.

WIS 2018 Turku, Suomi 27-29. 8. 2018. Well-being in the Information Society – Fighting Inequalities

University of Turku and the Baltic Region Healthy Cities Association organize the seventh Well-Being in the Information Society conference.

Welcome to WIS 2018, which looks for innovations and fresh ideas in the cross-section of urban living, information society and health as understood in a wide sense. Starting in 2006, this is now the seventh conference in its series.

WIS 2018 seeks high-quality contributions based both on scientific research and practical experience. The conference is multidisciplinary in nature, gives room for qualitative and quantitative analysis, empirical surveys, case studies as well as for conceptual work; thereby making WIS 2018 a perfect forum for exchange of information and ideas.

International Conference on Global Telehealth GT2018 Colombo, Sri Lanka, 10.-11.10.2018

GT2018 will be hosted by the Commonwealth Medical Association and the Health Informatics Society of Sri Lanka, supported by the Asia Pacific Association for Medical Informatics (APAMI), Asia eHealth Information Network (AeHIN) and IMIA Telehealth WG. The conference will be held in association with the other meetings of Digital Health Week. The joint event will consist of coordinated parallel and plenary presentation sessions, as well as poster and product display sessions. An associated vendor exhibition and a workshop / tutorial programme will be held in conjunction. The GT2018 track will be scheduled over two successive days to allow all authors to make oral presentations of their papers.

The Telehealth domain of interest covers a broad scope: from enabling direct clinical interventions and interactions by real-time or store-forward processes, to patient centred care needs such as personal monitoring and care team support, and to education, policy and professional aspects. Telehealth contributes to the new challenges of healthcare sustainability, supporting development and delivery on a wide scale of innovative models of care for treatment of disease, patient health management, home-based care and self-care, preventive health and health promotion. Telehealth also acts as a major change driver in global health issues aided by the rapid uptake of leapfrog new technologies like mobile wireless communications, smart phones or tablet computers, website and internet-based online resources. Mainstream activities in healthcare systems internationally leverage Telehealth to address these areas, with overarching aspirations to improve access, efficiency, quality and safety. This conference provides a platform for sharing of related best practice and directions across the international community.

The EFMI 2019 Special Topic Conference, Hannover, Saksa 7.-10.4.2019

The theme of the STC2019 is ICT for Health Science Research. The STC2019 is dedicated to recent research & development supporting data systems in biomedical and translational research, semantic interoperability of such systems, and analytics of data from multiple systems in application domains such as clinical trials or registries for drug and medical device developments, for diagnostics, and for interventions. It will focus on methods and tools including ICT for Health Science Research (but not limiting to).

Deadline for paper submission 15.8.2018.
