

# Bibliography of Finnish Population Research 1983–1984

The bibliography covers mainly the literature on population research published in Finland during 1983–1984. Included are independent publications, articles in periodicals and statistics published in Finland as well as publications on Finnish population questions published abroad. In general the bibliography excludes nonscientific articles in newspapers and weeklies as well as unpublished reports and academic theses. Also not included are studies presented at proceedings of conferences held in Finland if they were written abroad and treated subjects outside Finland. Coverage is less complete in peripheral fields.

In principle the main divisions appearing in the Population Index have been used with added subdivisions better suiting Finnish circumstances. Studies covering several fields of demography, which should rightly be listed in two or more divisions are included in only one division, i.e. in the division representing the primary field, on which the report is centered.

Lists of literature on population research have been published in Yearbooks II–IV of the Finnish Population and Family Welfare Federation and since 1960 in the Yearbook of Population Research, at first every fourth year and now every second year.
