

Accessions to the Botanical Museum of the Finnish Museum of Natural History, University of Helsinki, in 2022

Mikko Piirainen, Sanna Laaka-Lindberg, Sanna Laine, Pertti Salo & Saara Velmala

Piirainen, M., Laaka-Lindberg, S., Laine, S., Salo, P. & Velmala, S., Botany and Mycology Unit, Finnish Museum of Natural History, FI-00014 University of Helsinki. mikko.piirainen@helsinki.fi

The herbarium accessions amount to 13,116 specimens, including 3,822 phanerogams and pteridophytes, 2,169 specimens of bryophytes, 13 of algae, 3,720 specimens of fungi and 3,392 specimens of lichens. Some details of noteworthy accessions are given here.

The accessions comprise 13,116 specimens incorporated in the Botanical Museum of the Finnish Museum of Natural History, University of Helsinki (acronym H) in 2022 (3,822 specimens in the Vascular Plant Herbaria, 2,169 specimens in the Bryological Herbaria, 13 specimens in the Algal Herbaria and 7,112 specimens in the Mycological Herbaria). The material has been received from the staff of the Museum and from other institutions, and as donations from private persons, or their reliquiae (marked "reliq."). The Botanical Museum offers the sincerest thanks to all donors. A considerable number of specimens has been obtained by exchange ("e"). Some material has been purchased. The total number of specimens in the systematic collections of H at the end of 2022 was 3,453,005; 1,740,151 of them are phanerogams, 95,536 pteridophytes, 2,521 zoocecidia, 627,258 bryophytes, 25,858 algae, 469,199 lichenized fungi and 492,482 non-lichenized fungi (including bacteria and viruses).

Some details of the most noteworthy accessions are given below. The italicised abbreviations *Al*, *Ab*, *N*, etc. in the lists refer to the biogeographic provinces of East Fennoscandia (map in

Kotiranta, H., Uotila, P., Sulkava, S. & Peltonen, S.-L. 1998: Red data book of East Fennoscandia. 351 p. Ministry of the Environment. Helsinki.). Abbreviations in capital letters used for the herbaria are according to Thiers, B. M. (updated continuously): Index Herbariorum (sweetgum.nybg.org/science/ih/).

Among the accessions the various systematic groups are represented as follows:
