

# Accessions to the Botanical Museum of the Finnish Museum of Natural History, University of Helsinki, in 2015

Mikko Piirainen, Pertti Salo, Roland Skytén & Saara Velmala

Piirainen, M., Salo, P., Skytén, R. &, Velmala, S., Botany Unit, Finnish Museum of Natural History, P.O. Box 7, FI-00014 University of Helsinki, Finland

The herbarium accessions amount to 19,879 specimens, including 4,570 phanerogams and pteridophytes, 2,699 specimens of bryophytes, 5,578 specimens of fungi and 7,032 specimens of lichens. Some details of noteworthy accessions are given here.

The accessions comprise 19,879 specimens incorporated in the Botanical Museum of the Finnish Museum of Natural History, University of Helsinki (acronym H) in 2015 (4,570 specimens in the Vascular Plant Herbaria, 2,699 specimens in the Bryological Herbaria and 12,610 specimens in the Mycological Herbaria). The material has been received from the staff of the Museum and from other institutions, and as donations from private persons, or their reliquiae (marked "reliq."). The Botanical Museum offers the sincerest thanks to all donors. A considerable number of specimens has been obtained by exchange ("e"). Some material has been purchased.

The total number of specimens in the systematic collections of H at the end of 2015 was 3,310,380; 1,790,678 of them are phanerogams, 93,788 pteridophytes, 2,366 zooecidia, 640,189 bryophytes, 22,141 algae, 440,355 lichenized fungi and 436,703 non-lichenized fungi (including bacteria and viruses).

Processing of the extensive private herbarium of Prof. Aino Henssen (1925–2011) was continued, but not yet completed.

Some details of the most noteworthy accessions are given below. The italicised abbreviations

*Al*, *Ab*, *N*, etc. in the lists refer to the biogeographic provinces of East Fennoscandia (map in Uotila et al., *Memoranda Soc. Fauna Flora Fennica* 77: 14, 2001) and *Ög*, *Upl*, *Tr*, *VFi* etc. to the biogeographic provinces of Sweden and Norway (map in the back cover of Jonsell, B., ed., *Flora Nordica*. 2000–). Abbreviations in capital letters used for the herbaria are according to *Index Herbariorum*, I: The Herbaria of the World (<http://sweetgum.nybg.org/science/ih/>).

Among the accessions the various systematic groups are represented as follows:
