

LEXICAL INDEX TO THE POEMS

The following index lists all the words (with the exception of the article, suffixes and conjunctions *wa-* and *fa-*) used in the raġaz verses in these collections together with reference to *all* attestations, except for some very frequently used prepositions (viz. *bi-*, *‘alā*, *‘an*, *fī* and *min*), for which I have only given the number of references in each poem in order to keep the Index down to a reasonable size⁹⁴.

I have not divided the lemmata according to the meaning of the word, except in a few cases where the meanings have very little in common (e.g. *in* ‘if’ vs. *in* neg.). The alphabetical order is more or less the one used by Wehr in his dictionary with the notable exception that I list reduplicated biradical roots directly after the med. gem. roots. The order endeavours to be primarily pragmatic, even when other solutions would be theoretically more valid.

Finite verbs have been given only as roots (e.g. QTL I), other words are given in the form in which they are found in the text (without case vowels; dual and sound masculine plural have been given in the nominative irrespective of the case in the text).

An asterisk (*) before the lemma means that its parts are also independently listed (i.e. **idhā mā* means that the references are also given under *idhā* and *mā*).

The separate collections have been marked by A, A, G, H, and Gh for al-Aghlab, Bashīr, Ġandal, Ḥumayd and Ghaylān, respectively.

⁹⁴ The attestations of *ka-* have been listed in full because of their importance for the study of the metaphors in the poems.
